Subject: for the USPO

----- Message Contents -----

Hi Susan,

I haven't had access to my inbox for a few days so I don't have your original message, nor do I have Phil's email address. But I hope the following is what you want for the USPO. For your information, I anticipate that by late September I will have a semi-permanent mailing address in Cairo, and I expect that mail will be quicker and more reliable there. I will let you know.

To the U.S. Patent Office:

I am currently traveling in the Middle East, and do not have a mailing address. Furthermore, the places I am visiting do not have a well-developed infrastructure. When I have had a mailing address, it has taken one month or more for mail to reach me from the U.S. Outgoing mail takes a similar amount of time to reach the U.S., and sometimes it does not ever reach its destination. Courier services are reliable but arranging to receive such deliveries is an extreme inconvenience for me in my current situation. This is my situation for the indefinite future. I will notify ZymoGenetics as soon as I am again able to receive and send deliveries.

Theresa M. Farrah
